

MANUFACTURING START-UPS & SCALE-UPS IN BELGIUM:

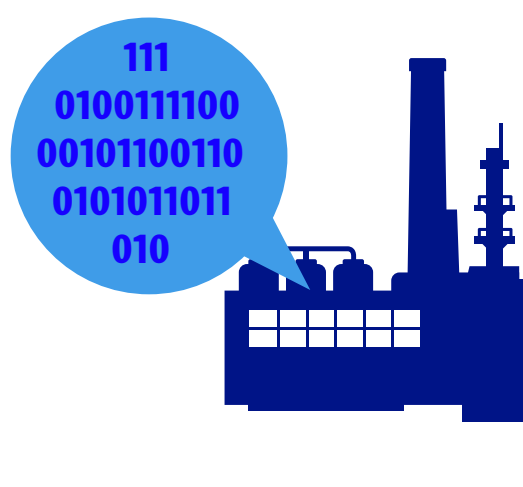

URGENT NEED FOR NEW BLOOD!

The Belgian manufacturing start-up & scale-up eco-system performs in:

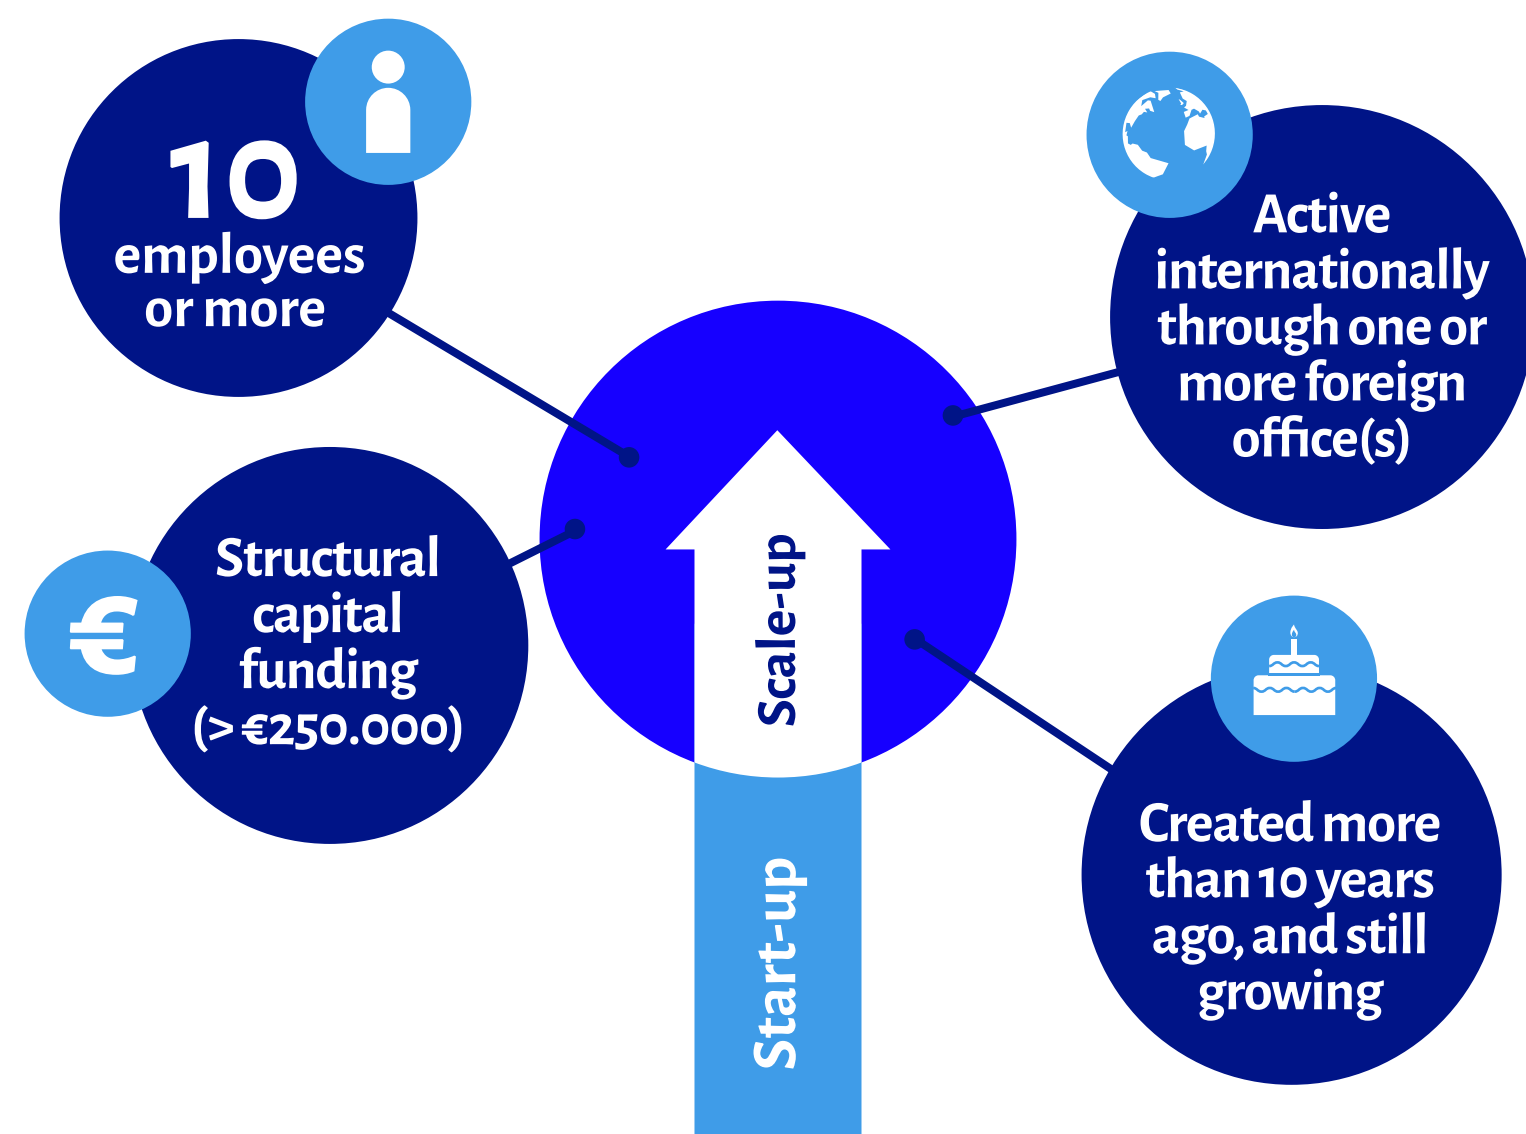

Production of connected hardware

and/or

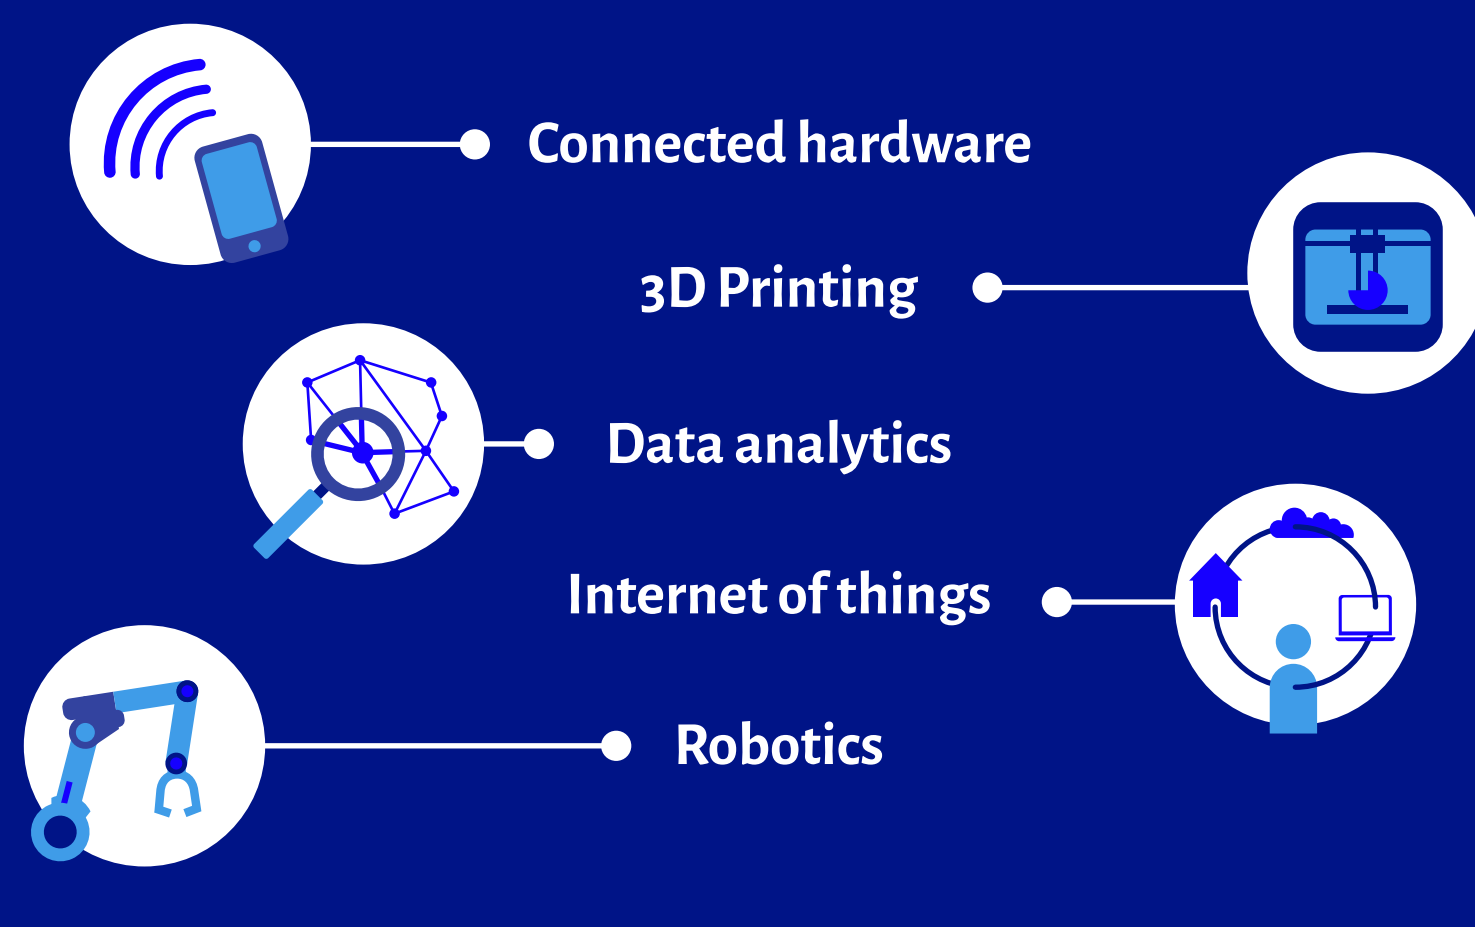

Production of software products for the manufacturing industry

A start-up becomes a scale-up when fulfilling at least one of the following criteria:

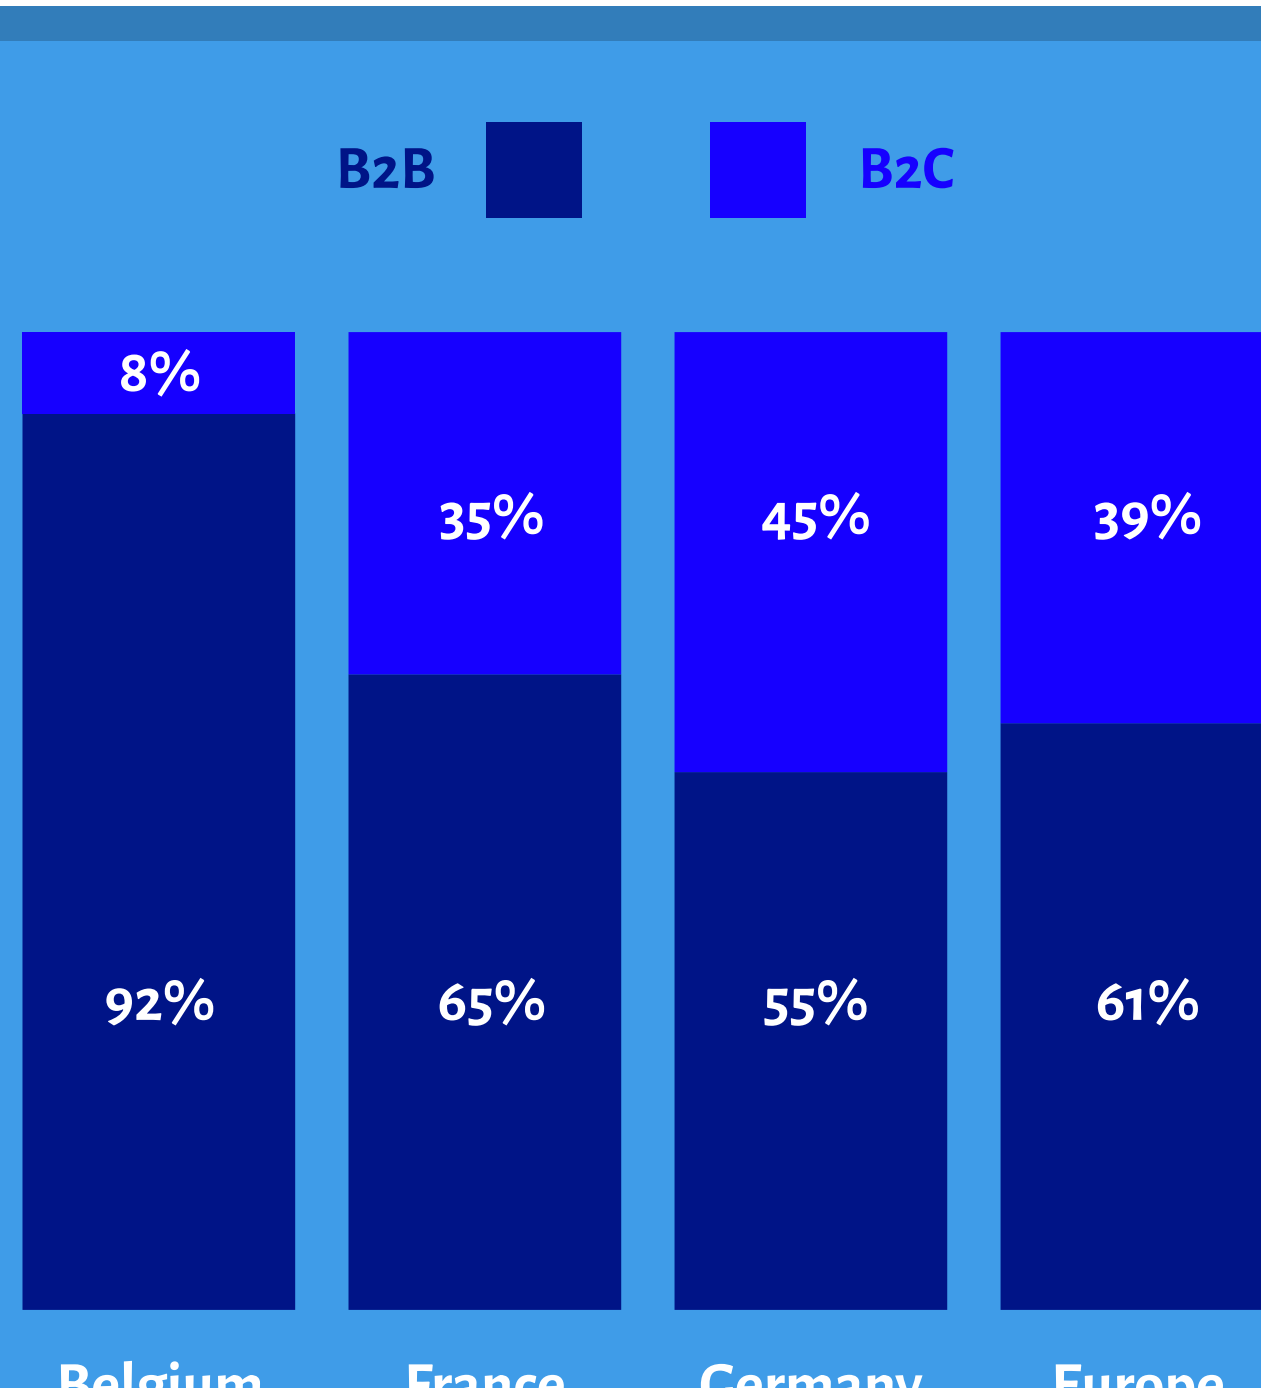

WHAT TECHNOLOGIES DOES THE BELGIAN MANUFACTURING START-UP & SCALE-UP ECO-SYSTEM OFFER?

BELGIUM IS A B2B COUNTRY WITH A STRONG MANUFACTURING FOCUS

Unlike our neighbouring countries, the vast majority of Belgian start-ups & scale-ups is B2B oriented:

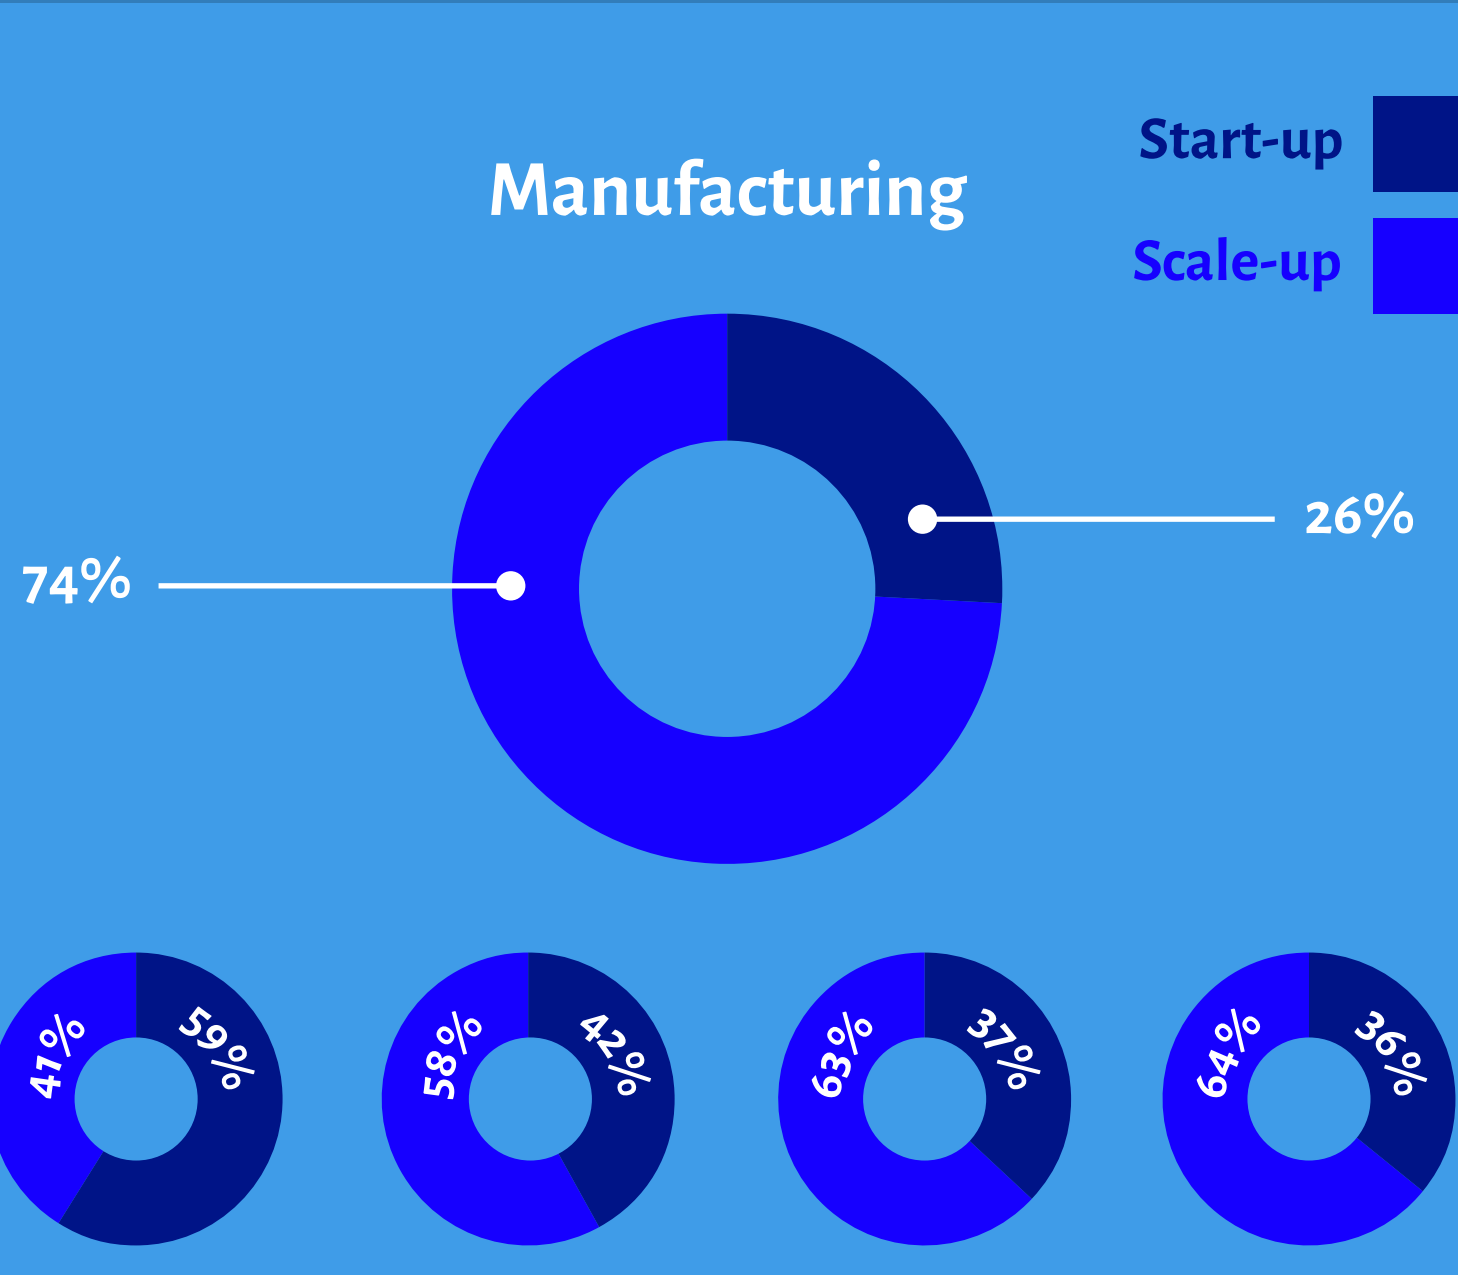

Over the past 15 years, manufacturing has always ranked in top 3 as activity focus of Belgian start-ups & scale-ups

BUT...

Their average founding year is 2003. This is much older than start-ups in HR Tech (2010), Health Tech (2009) or Fin Tech (2008)

Compared to the number of scale-ups, the Belgian manufacturing start-up % is too low:

Conclusion : Manufacturing start-ups & scale-ups in Belgium is a long-lasting, mature eco-system that needs new inflow.
